

Company Profile

1	<p>Until now, Takenobe has nurtured inexperienced craftworkers in a short period of time with an educational program that repeatedly specialized work with excellent veteran craftworkers as instructors.</p> <p>In addition, we have created technological innovations such as new construction methods and safer paints, and we are growing our business scale. Then, we realize to provide an environment that can polish skills with peace of mind so that all of our staffs have high-level goals and work with high motivation. Takenobe focus on improving productivity through efforts to pass skill transfer with ICT technology and through improvement of working efficiency.</p> <p>In addition, we accept a wide range of talent including women and foreigners, For example, there are some of female co-workers who play an active part as a construction site supervisor.</p> <p>Will you cooperate in making a new painting company together with us?</p>

3	<p>Takenobe is a long-established painting company of 68 years foundation. We are constructing a painting work on properties contracted by major general contractors, government agencies, and private companies.</p> <p>In addition, renovation and reconstruction of detached houses and large apartment buildings are constructed by ourselves.</p> <p>We have abundantly experienced craftworkers with high technical skills, created a new construction method cultivated in that technology, and acquired numerous patents and utility models.</p> <p>Our painting business is expanding from JPY1.5 billion in annual sales in 2003 to estimated JPY3 billion in 2018.</p> <p>In the near future, in the construction industry it is expected that a large number of elderly people will leave, we are currently actively adopting ICT technology. For example, we visually record veteran craftworkers' skills and know-how, and are in process to build a sophisticated system where everyone can see it with smartphone. We also develop painting robots and work on improving skill-transfer and productivity with ICT technology, such as leaving the robot with work that is versatile and has a heavy burden on human body.</p> <p>Finally, diverse human resources such as women of a wide age and foreigners are active not only in craftworkers but also in on-site supervision department and the ICT department.</p>
